

## MC Pro / S5-MC 1.4.1 Release Notes

P/N: 840-09948-10

**Version: 1.4.1**

**April 2009**

EuCon 1.4.1 adds several major features including EuCon support for Digital Performer 6. Pyramix 6.1.3 support is also added and includes several performance enhancements and new features including track type colors, support for Stereo Pan modes and unlimited track counts (see below for full list). Pro Tools 8 support is also included.

EuCon 1.4.1 is also Windows Vista compatible (32 bit).

### **Compatibility**

The MC and System-MC can control any application. EuCon aware applications have the highest level of integration. These applications include:

- Nuendo 4
- Pyramix 6.1.3
- Logic Pro 8.0.2
- Digital Performer 6
- Sonar 7.0.2 and 8.0
- Apogee Maestro 1.7 (Duet and Ensemble)
- Metric Halo MIO 5.1
- Pro Tools LE & HD 6.9 and above (HUI via EuCon)
- Final Cut Studio 6 (Mackie Control Universal via EuCon)
- Soundtrack Pro 2 (Mackie Control Universal via EuCon)
- RME HDSP Mixer (Mackie Control Universal via EuCon)
- Sony Vegas 7.0 & 8.0 (Mackie Control Universal via EuCon)

### **Installation instructions**

Before installation of new EuCon software, back up your MC User Sets (see Section 2.2.4 of the Operation Manual). User Sets are not overwritten or deleted when uninstalling or installing, but as a precaution, it is recommended that you back up your User Sets before updating your EuCon software.

This release contains a new default User Set with new Application Sets for the most commonly-used audio applications and more. If you want these installed (which is recommended), delete your existing User Set directory after making a backup copy of it. Do this before installing the new version of EuCon.

#### **Installing:**

A new set of installer files are included in this release. Please read carefully.

**EuConWS\_1\_4\_1.exe** (Windows XP/Vista 32 only)

- EuCon Core (MC Client / EuDiscovery)
- Studio Monitor Express (optional)
- Studio Monitor Pro 2 (optional)

- Nuendo adapters
- Nuendo VST XML files
- Pyramix adapter

**EuConWorkstation\_1\_4\_1.dmg** (Mac only)

- EuCon Core (MC Client / EuDiscovery)
- EuCon application adapters

**StudioMonitorExpress.dmg** (Mac only)

- EuCon Core (MC Client / EuDiscovery)
- EuCon application adapters
- Studio Monitor Express

*Note: for Mac installation, users should only use one of the above mentioned installers.*

**EuConMC\_1\_4\_1.exe**

- MCapp software
- CM408T module update server

*Note: it is important to uninstall MCapp and restart before installing the new software!*

## **New Features**

### **General:**

- Windows Vista support
  - Vista users need to turn off User Account Control (UAC)
- Digital Performer 6 support via EuCon
- Pyramix 6.1.3 support including several performance improvements
- Metric Halo MIO 5.1 support
- Pro Tools 8 support

### **Pro Tools 8:**

- EQ knobset is now fully compatible with Pro Tools 8
- Minor changes to default User Set

### **Pyramix 6.1.3:**

- Added Track Colors (track types)
- Added Width Control for new Stereo panner modes
- Better memory performance for Oasis-EuCon adapter
- Support for unlimited channel counts
- Faster performance with large projects

## **Bug Fixes**

### **General:**

- Meter redraw errors are fixed when banking & nudging tracks of different meter widths
- Attention Fader is no longer removed if you delete the "Attentioned" track.

### **Pro Tools:**

- Default Userset Changes:
  - Read, Write, Latch, Touch, Trim and Off buttons on Automation SoftKey bank are replaced with Read All, Write All, Latch All, Touch All, Trim All and Off All.
- Changing Transport mode no longer opens plug-in window.
- Insert Labels now update while touching knob in Insert Assign mode (CFG)

### **Pyramix:**

- Resolved occasional crash/hang when Quitting Pyramix
- EQ curve display now follows changes in EQ curve type
- Fixed EuCon crash after changing submitting changes in the Controller properties
- Multiple instances of the same plugin on a channel can be edited
- Smoother pan and aux knob performance
- Record LED stays off for mixer tracks not assigned to a playback track
- Panner on/off switch as well as touching knob updates pan graph
- General Stability improvements

### **Nuendo:**

- Nuendo Folddown Switches no longer missing in new Monitor GUI on MC Touch Screen

## **Known Issues**

**Issue:** DP6: Selecting across multiple tracks will cause multiple track selection on the surface. With Attention and Select linked this can cause the Attention Fader to Attention a random selected track.

**Workaround:** Turn "Attention Selected Track" off in MC App preferences.

**Issue:** In DP6, a blank default plug-in window opens when editing plug-in insert slots higher than 1.

**Workaround:** The correct window will be displayed when any control is adjusted.

**Issue:** Surround Pan Control is not implemented in DP6 EuCon adapter

**Workaround:** Use the GUI controls for surround pan control

**Issue:** When using Windows Vista, mouse control is lost when security pop-up windows are in focus.

**Workaround:** Keyboard control is still active, however turning off User Account Control (UAC) ensures that mouse control is maintained.
